Note 5: Posts allocated to the deanery & funded by the diocese as at 1 February in the prior year (when the allocation is made), whether or not the posts are filled then.

Note 6: The diocesan average net cost for the type of post, based on the budget for the year and including (as applicable) salary, housing, training & other indirect costs. The amounts shown are after deducting certain glebe and other income which covers part of the actual gross costs.

Note 7: The total cost of curates in training is included as part of the cost per post of all stipendiary clergy in the diocese, rather than being attributed to the training posts.

Note 8: The costs of posts shown as allocated to an archdeaconry (rather than a particular deanery) are spread across deaneries pro rata to the deaneries' initial share allocation.

Note 9: Given to deaneries with wards in the 3,000 most deprived wards in the country, by deducting a number of stipendiary posts (so that the value of the allowance is maintained as the costs of posts rise).

Percentage increase over previous year	<i>t</i>		2.5%			3.9%
Proportion of adjusted net ministry cost covered	<i>u</i>	<i>s as % of g</i>	164%			157%

Note 10: The total parish share required is £16,789,000. Allowing for the net amount raised by ministry cost & transitional adjustments, the initial total to be allocated is £16,502,410.

Note 11: The additional adjustment made this year to increase/(decrease) a deanery's initial allocation of parish share so as to move it nearer to that deanery's adjusted net ministry cost. This adjustment is added to any adjustment brought forward from the previous year.

Note 12: The cumulative ministry cost adjustment is limited so that parish share is not increased to more than 100% of adjusted net ministry cost or reduced to less than 140%.

Note 13: The transitional adjustment limits any deanery's increase to a maximum of 7.5% (2007: 7.5%) and a minimum of 2% (2007: 2%).

E - Analysis of Change from Previous Year

	Initial allocation £	Ministry cost adjustment £	Transitional adjustment £	Total parish share £	Increase/ (decrease) %

Net effect of change in potential income (note 16)	125			125	
Effect of increase in total initial allocation (note 17)	38,668			38,668	3.0%
Increase/(decrease) in initial allocation to deanery	38,792			38,792	
Increase/(decrease) in initial allocation to deanery (as above)		38,792			
Brought forward ministry cost adjustment		(1.0%)			
Effect of change in initial allocation on brought forward adjustment		(388)		(388)	(0.0%)
Initial allocation to deanery for 2008		1,338,406			
Additional ministry cost adjustment this year		(0.5%)			
Effect of additional ministry cost adjustment this year		(6,692)		(6,692)	(0.5%)
Effect of limiting ministry cost adjustment (note 18)		-		-	-
Effect of change in transitional adjustment (note 19)			-	-	-
Parish share in 2008	1,338,406	(20,076)	-	1,318,330	2.5%

Note 14: This reflects the fact that the deanery's four year average electoral roll has increased by 1.8% compared with a diocesan average increase of 1.1%.

Note 15: This reflects the change in the average income of the population of the deanery as a whole, relative to other deaneries.

Note 16: This reflects the increase in the deanery's proportion of total diocesan potential income from 8.11% to 8.11%.

Note 17: The increase in initial allocation is less than the overall parish share increase of 3.5% because some of the latter comes from the ministry cost and transitional adjustments.

Note 18: The cumulative ministry cost adjustment is limited so that parish share is not increased to more than 100% of adjusted net ministry cost or reduced to less than 140%.

Note 19: The transitional adjustment limits any deanery's increase to a maximum of 7.5% (2007: 7.5%) and a minimum of 2% (2007: 2%).
