3	<b>Correspondence, policy and other matters for consideration</b>
---	---

**DAC Vice Chair Appointment**

The DAC resolved to nominate David Tyler as Vice Chair. The appointment will be considered by the Appointments Committee on the 27<sup>th</sup> March, and subsequently by Bishop’s Council on the 3<sup>rd</sup> May.

**Reading Motion and Net Zero Action plan at Diocesan Synod**

The DAC noted the papers detailing the proposed motions and a verbal report was given by the Chair summarising the outcome of the Diocesan Synod discussions.

**DAC Membership update**

The DAC noted the attached paper. Please do send suggestions of possible suitable candidates for remaining vacancies to Liz Kitch.

**DAC Spring Learning and Review Day**

The DAC were notified of the learning and review day taking place on Wednesday 24<sup>th</sup> May and were asked to send RSVPs to Carolyn Jupe by Monday 27<sup>th</sup> March (dac@oxford.anglican.org)

**Declaration of interest forms**

The DAC were reminded that all members of committees that report to Bishop’s Council (as the DAC does) are required to submit a new declaration of interest form for this year and were asked to complete and return these to Carolyn Jupe by Monday 27<sup>th</sup> March (dac@oxford.anglican.org)

Reviewing members:	Bryan Martin
--------------------	--------------

Project architect:	Brocklehurst Architects
--------------------	-------------------------

Proposals:	<p>Internal Reordering. Faculty granted for scheme December 2021.</p> <p>The Chancellor directed that the petitioners were to work with their professional advisers and the DAC to:</p> <p>‘select and arrange for the re-laying of as many of Street’s original tiles as can be salvaged, and to commission as many suitable reproduction tiles as are required, to replicate Street’s original design for the nave floor. However I recognise that this may prove to be difficult or impracticable. In this event, the court may be prepared to limit the Street tiled flooring to the central aisle and the north and west ends of the nave, leaving the north and south aisles to be covered by a stone surface.’</p> <p>The full judgement, and report subsequently produced by the parish, are available on the supporting documents tab of the OFS.</p> <p>At its November 2022 meeting the DAC reiterated its support for the parish’s favored option (option 4 - all new stone floor to design by Brocklehurst Architects in collaboration with Artorious Faber) and supplemented this by also supporting Option 3 (a new stone floor with the creation of a tiled east to west central aisle).</p> <p>The DACs view, along with the parish’s report was submitted to the Chancellor for consideration, and to the Victorian Society (as required by the judgement). The Chancellor then directed that the Victorian Society were to have 21 days to provide their comments. They did so and in January 2023 provided the comments set out in the document uploaded to the OFS, restating their original position but stating they would also support Option 2 (replicate floor design with reproduction tiles).</p> <p>The Chancellor then requested that the parish provide a response to this. They did so, placing emphasis on the DACs view. The Chancellor therefore requested whether the DAC wish to comment on the parish’s latest response.</p>
------------	--

**March 2023 Minute:**

The DAC, in coming to its decision, was aware of information regarding project delivery costs and timeframes, and the mood and morale within the congregation.

In 2021 the project costs were estimated to be £550k and in the 2022 report the differing floor finishes were estimated as follows:

- Floor Finish Option 1, £272k
- Floor Finish Option 2, £73k
- Floor Finish Option 3, £57k
- Floor Finish Option 4, £54k

In 2023 the parish have invited tenders for the project, with a start date after Easter 2023 and a completion date before Advent 2023. The best tender response is £850k excluding VAT and professional fees. In order to keep the project viable and moving forwards the parish lead has asked the architects and contractors to find savings of £175k. To simplify the tender process the parish instructed contractors to only quote for Option 4.

The project was originally scheduled for 2022 but was delayed addressing the objections raised by the Victorian Society. In the past year they have incurred further costs, both through the delay and further professional fees, to produce the report requested by the judgement. The project has so far cost the parish £150k over six years. The parish lead has informally reported to the Head of Church Buildings, that the parishioners are at the point where further delays or increases in cost may result in the project being abandoned. Finally, the parish will be entering into a 12-to-24-month interregnum from Easter 2024 and feel the moment is now to make the project happen.

The DAC echoed the Chancellor’s concerns about the Victorian Society’s expert witness’s evidence on the ease of recreating a tiled floor (option 2). The Chancellor’s judgement accepted option 2 might be very expensive, prohibitively so (only regretting at that point the lack of actual figures), and the parish have now demonstrated that to be the case, (and incurred further cost paying advisors in doing so). The DAC are of the view that the floor is not of sufficient significance to warrant replicating, that to do so would be unduly expensive and impractical, and in addition, would be inappropriate from the perspective of accepted conservation philosophy.

This being the case, the DAC continued their support for the parish’s preferred, and cheapest option, option 4. The practical reasons for supporting this option, and not others, were outlined by the DAC in the memorandum to the Chancellor issued at the time of the NOA (Dec 2020) and updated in January 2021. The September 2022 floor report by the parish further convinced the DAC that option 4 is the most appropriate, not only for practical reasons, but also to provide a coherent, honest, design for the re-ordered interior.

In November 2022 the DAC also stated that they would, as a compromise, support option 3, and it reiterates that support in the event that option 4 is not felt permissible by the Chancellor.

### Cookham Holy Trinity

<a href="#">2022-073416</a>	Berkshire	Grade II* Listed	SH
Statutory consultees:	Historic England, SPAB, Victorian Society, CBC.		
Reviewing members:	Ms G. O’Farrell (DAC heating adviser)		
Project architect:	N/A		
Proposals:	Heating overhaul as part of a wider reordering scheme- Installation of 12x Herschel Halo FAR infrared chandeliers (request for DAC view on new suggestion arising from Energy Audit)		
Previous DAC minute:	<p>November 2022: Concerning the question of “due regard”, the DAC assessed the submissions in light of the following evaluation matrix ratified earlier in the meeting:</p> <ol style="list-style-type: none"> <li>1. Is the plan put forward within the Practical Pathway to Net Zero realistic and proportionate to the size and use pattern/energy consumption of the church?</li> <li>2. Has the parish taken on board the advice contained within the energy audit/provided by the Diocesan Environmental Team?</li> <li>3. Are the present proposals being put forward at an appropriate time in their journey to Net Zero?</li> </ol> <p>In applying these questions to Holy Trinity, it was acknowledged that it would not have been possible for the PCC to have complied with the second point at the time of discussion, not having received the Energy Audit. However, the committee considered that the Pathway to Net Zero document provided by the parish needed to go further by putting forward a plan for how the PCC proposes to decarbonise the church’s heating system. Clearly, it would not be right for the DAC to mandate modes of decarbonisation, and there may be churches where, applied to heating, this is</p>		

problematic. But where heating will account for the lion's share of the church's energy consumption and the proposed system is based on a fossil fuel sources, the committee was agreed that any Pathway to Net Zero document would need to demonstrate how PCCs plan to reduce energy consumption and improve efficiency across the board, and particularly with regard to heating.

The committee disagreed with the statement contained within Mr Reading's report that "all experts agree that in general heat pumps are not a good match for historic church heating systems". In fact, the committee considered, in line with the latest guidance from Historic England and the Church Buildings Council, that Air Source Heat Pumps can be ideally suited to underfloor heating systems:

[https://www.churchofengland.org/sites/default/files/2021-09/Heating\\_options\\_appraisal.pdf](https://www.churchofengland.org/sites/default/files/2021-09/Heating_options_appraisal.pdf) and <https://historicengland.org.uk/advice/technical-advice/energy-efficiency-and-historic-buildings/low-and-zero-carbon-technologies/installing-heat-pumps-in-historic-buildings/>

The committee agreed to delegate the decision concerning the proposals to the subcommittee. They were of the view that, without proper demonstration of due regard, or significant revision of the methodology to include a more environmentally friendly fuel source, the proposals cannot be recommended, and that these issues would need to be addressed before a "recommend" NOA could be issued.

#### March 2023 Minute:

While there were those on the committee who had reservations about the aesthetics of the Halo units, it was agreed that these are an improvement on the types of comparable heater previously available. Having had sight of the promotional information, technical data, and first-hand experiences of the CBOs and DAC chairman who visited a trial of these units at Bristol St Matthew in January, the DAC was of the view that these units would have a somewhat limited efficacy and would therefore be best utilised as a supplementary form of heating rather than as a sole heating solution. However, it is for a parish to ascertain the benefits and efficacy of a chosen heating method, whereas the DAC need only assure itself that an installation is not going to be harmful in any way.

The committee was sympathetic to Holy Trinity's predicament and acknowledged that until such time as the UFH is agreed (for which the DAC is mindful a choice of fuel has not yet been agreed), the church is essentially without heating, and there is no easy solution to this. Given the constraints of the building, it was acknowledged that options for heating which are relatively instantaneous, comparatively cost-effective, reversible and in line with Net Zero principles, are extremely limited. As such, the committee was not averse to the possibility of the Halo heaters being installed, subject to conditions. It was considered that a DAC delegation meet with the PCC and someone from Herschel, to establish:

- The impact of the units on the interior of the church
- The exact mounting positions and heights to balance aesthetics and performance
- The suspension mechanism
- Any bespoke details for the design (it is possible to choose a laser cut design for the band of the chandelier etc)

The committee was content to delegate the issuing of a notification of advice recommending the units to the visiting subcommittee, provided the subcommittee was satisfied from the visit that the installation would not be aesthetically or environmentally harmful. Subsequent to the meeting, the parish has requested to pause on this proposed heating method, pending further investigation of alternative methods.

6	<b>Casework - New</b>
---	-----------------------

### Wendlebury St Giles

<a href="#">2023-082037</a>	Dorchester	Grade: II	JS
Proposals:	Provision of WC and servery facilities in the north transept; removal of pipe organ and 5 pews at east end of nave; floor repairs not included; no alterations to heating or lighting		
Project architect:	Charles Darby, Maggie Forester		
Statutory consultees:	SPAB, Vic Soc (no impact on Georgian fabric)		
Site visit attendees:	Archdeacon of Dorchester, Peter Preston, Julian Munby		
Date of visit:	16 <sup>th</sup> Feb 23		
March 2023 Minute:			
The DAC resolved to ratify the draft site visit report including the following summary recommendations:			
<ul style="list-style-type: none"> <li>• The parish and its advisers are encouraged to continue to develop the proposals along the lines of the alternative layout (drawing DR-A-02A).</li> <li>• The statement of significance includes a detailed history of the church but does not assess the significance of the surviving fabric. The surviving 13C fabric in the north transept is of high significance. The niche and tomb recess appear to be in their original locations and visual access to these features should be retained and enhanced, if possible. Concealing these features behind servery units or partition walls is not considered appropriate. The carved corbel/ head may not be in its original position unless it was adjacent to an altar in an earlier chapel. For this reason, it may be acceptable to relocate this feature within the church.</li> <li>• In addition to burials, there may be significant buried archaeology relating to earlier church buildings. An archaeological watching brief should be provided alongside proposals for services excavations.</li> <li>• The parish are advised to be careful not to ring fence funds or raise money against specific drawings to allow for changes to be made as the proposals evolve.</li> </ul>			

### Marcham All Saints

<a href="#">2023-081926</a>	Dorchester	Grade: II*	LK
Proposals:	Phase 1 - Alterations to existing modern west end gallery to enlarge kitchen, provide additional toilet, new servery and folding screen below gallery. Phase 2 - East end alterations to existing enclosures, reduction of dais and introduction of a ramp. Relocation of font and consideration of liturgical furniture.		
Project architect:	Christian Randall		
Statutory consultees:	Historic England, Vic Soc, LPA (not yet consulted)		
Site visit attendees:	Toby Wright, Julian Munby		
Date of visit:	23 <sup>rd</sup> Feb 23		
March 2023 Minutes:			
The DAC resolved to ratify the draft site visit report, supporting the principle of both phases of work (subject to detailing) and delegated phase one to a subcommittee for progression.			

## Theale Holy Trinity

<a href="#">2022-078169</a>	Berkshire	Grade: I	SH
Proposals:	Internal reordering, including pew removal, provision of WC, servery and creche; creation of west end level access; conversion of tower and library for meeting room spaces		
Project architect:	Christian Randall		
Statutory consultees:	Historic England (attended sv), The Georgian Group (attended sv), The Victorian Society (did not attend sv), LPA (did not attend sv) - no responses yet received from any.		
Site visit attendees:	Rev Liz Jackson (Associate Archdeacon of Berkshire), Ms Charlotte Robinson, Mrs Helen Ensor		
Date of visit:	1 <sup>st</sup> Feb 23		

### March 2023 Minutes:

The DAC resolved to ratify the CBO's report, agreeing to the following works, subject to consultation and the details being agreed with the subcommittee in due course:

- Creation of facilities and creche room and gallery access provision in the west end (except for the additional lavatory, which attempts to fit too much into an already cramped space)
- Lowering of pew platforms
- Internal access to transept and conversion of library rooms for meeting spaces
- Removal of present altar rail to improve flexibility of space in chancel.

The committee was supportive of the principle of the external access but considered that the design may need further refining as per the recommendations set out in the feedback, and ought to return to the full committee for agreement in due course.

The committee recommended that the following be omitted from the proposals:

- further removal of the pews and the removal of the choir furniture, considering this to be intrinsic to the superlative significance of the building.
- The first floor into the octagonal vestry since this was considered to be an invasive and complicated intervention for comparatively little benefit.

Any revision of proposals ought to return to the full committee, as should the proposals to glaze in the ground floor of the tower, which are supported in principle but have not yet been drawn up. Early-stage feedback is awaited from the Historic England and the amenity societies.

## Marston St Nicholas

<a href="#">2019-045917</a>	Oxford	Grade: I	JS
Proposals:	Removal of pews from west end of south aisle & restoration of flooring. The introduction of 6 <a href="#">Alpha Jacob chairs</a> to this area (stained to match the pews).		
Project architect:	Robert Montgomery		
Statutory consultees:	HE (no comment), CBC (content), Vic Soc (no response), SPAB (no comment)		
Site visit attendees:	Peter Groves, Julian Munby, David Clark		
Date of visit:	Feb 2020		

### March 2023 Minute:

The DAC resolved to issue a recommend Notification of Advice for the proposals.

--

### Sunningdale Holy Trinity

<a href="#">2023-081959</a>	Berkshire	Grade: II	SH/JS
Proposals:	Reordering of interior and removal of pews to provide WC, servery, meeting rooms and storage, small extension to west end		
Project architect:	Mark Goodwill-Hodgson		
Statutory consultees:	Historic England, Vic Soc, LPA (not yet consulted)		
Site visit attendees:	Archdeacon of Berkshire, Peter Preston		
Date of visit:	13 <sup>th</sup> Feb 23		

#### March 2023 Minute:

The DAC acknowledged the sterling mission and outreach that is taking place in this parish, and the genuine need for interventions to enable the building to better serve its community. The committee resolved to ratify the CBO's report and was generally supportive of the principle of some of what is proposed in terms of partitioning and provision of extra discreet spaces for the office and a ground floor meeting room/creche. It was considered, however, that Holy Trinity is of greater significance than its Grade II listing suggests, and that compromises would be needed in order for the proposals to work more sensitively with the existing architecture. Specifically revisions were asked for on the extent of subdivision of the nave and aisles, the first floor, the proposed glass west end extension, and the location in which certain groups meet.

The proposals to reverse the enclosure of the north transept and repurpose this space for worship, remove the pews, relocate the office to the south-west corner of the church, relocate the font, rationalise the dais were broadly encouraged by the DAC. However, the extent of glazing and partitioning to accommodate numerous separate children's, meeting and storage spaces, a mezzanine and first floor spaces in the body of the church was considered to be too invasive and lacking in justification. The committee encouraged that this be rethought, alongside a spatial audit and the rethinking of the needs for the number of spaces proposed, and whether these could be amalgamated in some areas to lessen the aesthetic and spatial impact on the main church.

The committee recommended that the proposal for the small, glazed west end extension be omitted, but suggested that the building could better tolerate a porch-style extension to the north, which could provide much-needed lavatory facilities instead. Revised proposals are encouraged in due course, at which point the consultation process can begin.

### Walton Holy Trinity

<a href="#">2022-073310</a>	Buckingham	Grade: Unlisted	LK
Proposals:	Installation of new stained-glass window celebrating 25 years of childrens' ministry		
Project architect:	N/A		
Statutory consultees:	LPA		
Site visit attendees:	None		
Date of visit:	N/A		

#### March 2023 Minute:

The DAC resolved to issue a supportive NOA is issued, with the text revision as a comment, rather than a proviso of the support.
